

Xerox Replacement Cartridge Total Performance Warranty

No risk...no worries...total performance

January 2010

Advantages of Xerox Replacement Cartridges

A trusted brand.

Greater value over the printer OEM (Original Equipment Manufacturer) cartridge—from the OEM that invented xerography...and cartridges.

Yield and image quality equal to the OEM cartridge.

Environmentally responsible—the sustainable choice for printing.

A Warranty with Triple Benefits

Xerox Replacement Cartridges give you performance equal to your OEM cartridge with greater savings and value. You don't have to sacrifice quality or take risk, to keep more money in your pocket. Use the cartridge from a leading OEM with unparalleled expertise in digital printing.

Put Xerox quality into your printer and get the advantage of a triple benefit total performance warranty:

OEM Quality

Xerox actually invented laser printing and has engineering laboratories dedicated to cartridge and drum product performance. There's no savings if your printed images are not sharp and clear or if page yield is not equal to the OEM. Xerox won't offer a cartridge if it won't pass our testing—from first print to last, in a variety of stressful environmental conditions.

Lifetime Performance

Xerox doesn't just stand behind every cartridge, but every print, too. So, if there is still toner in your Xerox cartridge, the last page should look as good as the first one. If not, Xerox will replace the cartridge to ensure that you are satisfied. It's that easy. No worries.

Risk-free Printing

When you choose a Xerox brand cartridge for your printer, there is no risk to your printer OEM guarantee. If our cartridge is traced to any printer damage, Xerox will pay your repair costs. It's that simple. No risk.

And more...

Downtime costs productivity—time and money. Our Triple Benefit Warranty pays dividends—in image quality and yield, lifetime performance and risk-free printing. But, that's not all there is to know about our replacement cartridges.

Remember that Xerox offers a **broad range** of replacement cartridges for a number of different OEM brands. Get the benefit of Xerox technology and know-how for all of your printers—check our list of cartridges and drums.

Plus, Xerox has a very long history of **environmental stewardship**. Why put a cartridge that is still usable in a landfill? Our wide range of replacement cartridges not only save you money, but help to keep waste from landfills. It's the best option for your check book and for the environment. And, when you recycle spent cartridges locally, it lowers your carbon footprint. Great news by any calculation.
